Research, Development and Education Group concerning Art and Science
Founded in 2010 by Roberto Denti

In collaboration with:

di Guido Marcello Poggiani

PROJECT

**“MAIL ART & QUANTUM ENTANGLEMENT:
CO-OPERATION AND PEACE IN THE WORLD”**

Quantum Art & Science for a New Renaissance

Innovation selected in 2011 by:

ITALIA DEGLI **INNOVATORI**

Agenzia per la Diffusione delle Tecnologie per l'Innovazione
Presidenza del Consiglio dei Ministri

Milan, January 2015

Have joined the project of Mail Art

“Colorado Department of Human Services”, psychiatric hospital in Colorado, Pueblo - U.S. Federal management.

“Science Centre-Art Research Centre Australia Inc. ”

The Science-Art Centre is dedicated to initiating a 21st Century Renaissance

Through the reintroduction of the classical Greek philosophy of science for ethical ends. The Centre views the re-unification of the arts and sciences as a solution to the destructive world-view that dominates all contemporary science and technology. Humanity's obsession with materialistic science and technology is leading to the ultimate destruction of our environment and needs to be balanced by the development of a humanitarian science and technology, based on newly emerging life sciences.

“TG-DRAGON Museum and Industrial Park”, TaiCan – Suzhou, Jiangsu Province - China founded in 1990 as a Cultural and Creative Industries, expanded in 2005 and again in 2011.

The school "CEDr.Galdino do Valle Filho," Brazil, with 12 classes, coordinated by the QAGI artist, Helena Carvalho.

WTP-Wroclaw Technology Park, Poland.

The objective of WTP is to create conditions for the use of scientific and industrial potential of Wrocław and the region and to stimulate the advanced technologies industry.

"ARSCIENCIA", an international non-profit socio-cultural based in La Coruña, Galicia, Spain.

Pay particular attention to the activities and events of science and art, organizing conferences and exhibitions to enhance and spread the teaching of art and science in education and society in general.

ABOUT US

QuantumArtGroupItaly is an interdisciplinary group founded in 2010 by Roberto Denti

The Quantum Art Group is born to conciliate Science and Art and its goal is overcome the mechanistic system for a new society based on New Human Being.

Scientist and artist with different birthplace and of every artistic discipline such as painting, sculpture, photography, movies, poetry, literature, dancing, acting and music belong to this group.

Every artist owns his style, his manner of see and live Art in high connection with contradictions of the society where he lives. Every artist is free to do his best to express oneself, is free to use the most congenial techniques to represent his thought, his mood, his own beliefs and whatever he desires within the respect to other persons.

QuantumArtGroupItaly in Contemporarily ART & Quantum Science aim to promote international activities which demonstrate how developments in science and technology can stimulate innovation in the creative ARTIST's sectors (Picture, Music, Dance, Theatre, and other exhibitions and events) , and how the complex ART-sectors can stimulate the emergence of innovative forms of creativity in future science and technology.

"QAGI new renaissance international program", works to highlight this aspect of the reciprocal influence of science (and technology) and contemporary culture to enhance the conceptual background of people by means promoting new forms of innovative culture.

So that QAGI program will be a catalyst-tool for the third Millennium approach to "creativity and innovation", based on emerging the importance of multidisciplinary culture in science & humanities, as a new method of a Global Knowledge Society to develop creative expression of new ideas and concepts.

OUR PROJECT

In the context contemporary decline of the cultural system, economic and social, all strategies based on the old industrial economy, are proving largely insufficient in tackling the current systemic crisis .

The Quantum Art wants to overcome the current cultural and social system based on the mechanism of Newtonian derivation in which every individual, every human activity and natural is considered as single particle, separated from the communication between all the others, as if it were part of a gear mechanical. In fact, the current model of culture (but also economic) is based on patterns, assumptions and concepts typically derived from mechanistic logic, since divided the concepts and variables involved in a pattern in which the various parts are not interacting with each other.

We want to overcome the traditional model of research cultural, social, and the old form of industrialization mechanistic obsolete and gradually replace it with forms of development of innovation KBBE. (Knowledge Based Bio Economy).

The basic themes of Quantum Art attract strong concepts such as cultural change understood as interplay between art and science oriented towards the promotion of a renewed critical thinking, understanding of the complexity of the natural balance, social and economic factors that create cultural strategies of bio -diversification of the living system and society.

We propose a partnership to use multimedia art forms and creative communication activities.

We want to communicate the technological innovation, scientific and artistic development of a new organization of enterprises, scientific research and art.

We want to create new products to communicate innovation, sustainability, high technology, luxury and creativity.

Our approach to design and production sees a strong correlation between art and science to create a new model of communication.

Quantum Art Group International

**QAGI is composed of artists
Italian, European, American, Chinese, Brazilians,
Australians and Scientists.**

**With them we have already collaborated
in the creation:**

The MAIL ART, QAGI Project

«QUANTUM ENTANGLEMENT: COOPERATION AND PEACE IN THE WORLD»

Mail art (also known as **Postal art** and **Correspondence art**) is a populist artistic movement centered around sending small scale works through the postal service.

It initially developed out of the Fluxus movement in the 1950s and 60s, though it has since developed into a global movement that continues to the present.

The American artist Ray Johnson is considered to be the first mail artist, and the New York Correspondence School that he developed is considered the first self-conscious network of mail artists.

If people in the world are working on a joint project of cooperation and peace, our minds send a message of Entanglement positive and reflected spreads throughout the world.

QAGI-Quantum Art Group International wants to engage on such an important subject, cooperation and peace in the world, the largest number of artists in the world through a synergistic interaction for the exchange of information and experience. We plan to involve people who are sick and prisoners, because art is creativity and can be of valuable assistance to therapy every day. In this way people will feel involved in a project and can cooperate in a positive way.

Thus was born the project MAIL ART "QUANTUM ENTANGLEMENT: COOPERATION AND PEACE IN THE WORLD"

They have joined this project:

- **Prof. Tang Zheng, China and its TG-Dragon Museum & Industrial Park;**
- **Prof. Robert Pope e dott. Robert Todonai, Australia di The Science-Art Centre of Australian Inc. and other Australian artists;**
- **The school "CEDr.Galdino do Valle Filho", Brazil, with 12 classes coordinated by the QAGI artist Helena Carvalho**
- **The Colorado Mental Health Institute at Pueblo (CMHIP) is one of Colorado's two state-operated inpatient psychiatric hospitals.;**
- **the voluntary association "A.T.S.M. Hope "of Santeramo in Colle province of Bari;**
- **The Bollate prison, Milan, Italy**

ARTE E SCIENZA QUANTISTICA EVOLUZIONE DI NUOVI MODELLI COGNITIVI

Attualmente stiamo attraversando un periodo storico di transizione in cui le arti scientifiche ed economiche che attraversano tutta l'umanità, mettono in evidenza la costruzione della cultura della società industriale di tipo meccanicista ed evidenziano come superata la concezione di una visione totalmente quantitativa della realtà e di tutti gli esseri viventi.

In questa trasformazione ed evoluzione sociale, gli anni più recenti e contemporanei più esperti ci stanno accorgendo che i valori su cui si basa l'attuale organizzazione sociale non sono certamente adatti a risolvere le continue crisi che il mondo sta attraversando: da quella energetica a quella ambientale, da quella finanziaria e monetaria a quella energetica, per non parlare dei conflitti armati in tutto il mondo.

In questo momento, le crisi degli attuali modelli sociali creano la necessità creativa nell'artista, così come viene ricercata la fisica quantistica che, a questo punto, suscita a nuovi modelli di interpretazione della materia, del cosmo e in definitiva, del mondo.

L'Arte Quantistica è la funzione generatrice del cambiamento, è la forza intrinseca, è la capacità di animare la realtà, secondo il nostro pensiero e la nostra volontà. Tutto questo deve fare i conti necessariamente con una società in declino e soprattutto con una società che deliberatamente ha deciso di relegare la cultura in un mercato decessivo di nostra creazione invece farla diventare per i popoli, la luce nella tenebre per grado di far elevare l'anima umana.

LA NOSTRA FILOSOFIA ARTISTICA, CULTURALE E SOCIALE

L'artista quantistico prende spunto:

- Dall'interpretazione artistica della scienza quantistica in tutte le sue formulazioni attuali e quelle che (e ora desideriamo).
- Dai sentimenti cognitivi e sociali interni come superamento dell'istinto meccanicista;
- Dall'interpretazione artistica dell'empatia;
- Dall'interpretazione artistica dell'attualità contemporanea al fine di definire una nuova dimensione etica del presente dell'umanità;
- Della poesia intesa come una intrinseca appartenenza ad un piano quantistico dove la futuribilità e la fantasia artistica vengono trasfusi in modelli concettuali e comunicativi in una continua ricerca del proprio e del rapporto al mondo reale.

L'artista quantistico si pone verso il sociale, l'economia e la cultura:

- Con una mentalità per la quale si considerano tutti i rapporti sociali, culturali ed economici non più basati sui rapporti di forza contrapposti come nella fisica newtoniana e ripresi dal sistema meccanicista, ma tutti questi rapporti, compresi quelli con tutti gli altri sistemi viventi, vengono interpretati sui concetti di pace e di cooperazione, senza violenza, odio/ostilità comprensive di ogni aspetto esistente vivente.
- Con una protezione quantitativa del proprio io e delle proprie creatività, basata su una attività evolutiva finalizzata alla ricerca di nuovi modelli di vita, nuovi rapporti sociali per arrivare alla Società della Compagnia Quantistica basata non più sulla sfruttamento della natura e dell'uomo, ma sulla pace e sulla armonia in pieno rispetto della biodiversità nel suo complesso.

Up to this moment came six works of the children of the kindergarten :

Dear Roberto,

Inside the box you'll find the artwork made by children from Educational Centre during the Recycling Art Workshops. Kids really enjoyed this classes so I think that we might repeat it in future, and send you something more.

Thank you one more time for inviting us to such an interesting project.

Hope that you'll have a wonderful Christmas time and a happy New Year.

regards,

Monique and Yvelle
